PROJECT – SPRINT 3

LETI-ESOFT ▸ 2025-2026

1 User stories

US12 - As Administrator, I want to get a list of all vaccines. [Priority: Medium]

AC12-1: The vaccines should be grouped by type and then listed alphabetically by brand.

US13 - As Administrator, I want to register a vaccination center. [Priority: High]

AC13-3: Community Mass Vaccination Centers must include the vaccine type administered.

US20 - As Receptionist, I want to register an SNS user. [Priority: High]

AC20-1: The Phone Number and Citizen Card Number must comply with the Portuguese format.

AC20-2: The attribute Sex is optional. All other fields are required.

AC20-3: The Phone Number, E-mail Address, Citizen Card Number and SNS User Number must be unique across all registered SNS user.

US30 - As SNS user, I intend to use the application to schedule a vaccine administration. [Priority: High]

2 Remarks

Teams should focus on high-priority user stories, which are mandatory. **Medium-priority user stories are also mandatory, but only for teams composed of four students**.

User stories should be further demonstrated through a simple yet effective console-based interface, representing the "Console PVMS APP" (cf. Figure 1 of the Project Assignment document).

Although the system currently relies on in-memory data persistence, by the end of this sprint **it should be prepared to seamlessly support alternative persistence mechanisms**, particularly relational database storage.

Finally, it is worth noting that teams are expected to identify additional acceptance criteria beyond those already specified.
